

ZEEWATERBESTENDIG

Onze messing huiddoorvoeren, afsluiters en fitwerk gemaakt van z.g. **DZR Messing** (DeZincification Resistant), ook wel CR Brass of ontzinkvrije messing genoemd. Ze zijn gemaakt van een speciale legering (CW602N en CB752S)

Voordelige messing huiddoorvoeren en afsluiters lopen een groot risico op ontzinking onder invloed van zeewater en galvanische corrosie en zouden dus niet onder de waterlijn mogen worden toegepast.

Studies tonen aan dat standaard messing tussen de 0.05 en 0.2mm per jaar corrodeert, terwijl dat bij DZR Messing minder dan 0.02mm is.
